Professional Summary

Technical Bridge SE supporting Japanese financial projects across requirements, specification translation, implementation review, impact analysis, and regression testing. Investigates Java/Spring Boot code and PostgreSQL schemas, independently identifies specification-to-implementation gaps, and coordinates corrective actions with customers and developers. Also builds full-stack applications and Go/MCP/Gemini agent tooling.

Work Experience

VINICORP - Viet Nhat General JSC

Technical Bridge SE

Vietnam

May 2025 - Present

Japanese Financial Sales Support System

Jul 2025 - Jul 2026

- Supported Japanese securities and investment clients in a seven-member team developing and maintaining a multi-client financial sales-support system.
- Worked on approximately 300 functions in total through specification review and translation, requirements communication, testing, investigation, and client-specific customization; translated more than 10,000 test cases from Vietnamese into Japanese.
- Facilitated online customer meetings, clarified requirements, and coordinated issues between Japanese stakeholders and the development team.
- Independently identified discrepancies across business flows, specifications, database definitions, and source code; reviewed implementation and tracked corrective progress.
- Earned enough trust from the customer to be asked to review specification and design content beyond the formally assigned scope.
- Performed impact analysis and regression testing for complex approval and cancellation flows; designed, implemented, and maintained JasperReports output from requirements through Java integration.

Japanese Financial Monitoring System

May 2025 - Jun 2025

- Supported the Adobe-to-Aspose reporting-library migration, including customer meetings, document translation, specification clarification, and feedback to the development team.

Selected Projects

Vinaside - Accommodation Booking Platform

May 2025-Sep 3, 2025, Team Lead (4 members)

- Led development of a full-stack platform covering property search and booking, property/staff administration, RBAC, real-time chat, VNPay payments, vouchers, dashboards, and email notifications.
- **Tech:** React, Vite, TypeScript, NestJS, MongoDB, Socket.IO, Redis, AWS S3. **Code:** [Frontend](#) / [Backend](#)

Custom MCP Host

Personal project, Aug 2026

- Built a Go agentic loop connecting Gemini to MCP tools, plus a Bearer-authenticated HTTP/SSE gateway with filesystem policy, timeout, iteration, concurrency, and result-size controls.
- Designed role-based AI-agent workflows for Gemini and OpenCode using reusable Agents, Skills, Rules, and Commands for BA, Architect, Developer, Tester, QC, and DevOps roles. **Code:** [GitHub](#)

Nem Mo E-commerce Platform

Oct-Nov 2024, Team Lead (4 members)

- Led delivery of an online store with authentication, product/catalog management, shopping cart, VNPay payments, comments, and PHPMailer notifications. **Tech:** PHP, JavaScript, HTML, MySQL. **Code:** [GitHub](#)

Education

Foreign Trade University

Business Administration

Vietnam

Aug 2026 - Present

FPT Polytechnic College

Information Technology - GPA: 3.6/4.0

Vietnam

Jul 2023 - Aug 2025

Japanese Studies in Japan

CODO International Academy, CODO Tourism Vocational School, Kyushu Ryukoku Junior College

Japan

Apr 2018 - Oct 2021

Technical Skills

Languages: TypeScript/JavaScript, Java, Go, PHP

Frameworks: Spring Boot, Spring Batch, React, Next.js, NestJS, Node.js/Express

Data & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS S3/EC2/SSM

Tools: JasperReports, Git, Docker, Postman, MCP, Gemini/OpenCode AI agents

Certifications

Japanese-Language Proficiency Test (JLPT) N2

Dec 2019
